As a frontend developer and student at the University of Moratuwa (NDT), I'm passionate about blending creativity with technology. Specializing in Information Technology, I'm dedicated to crafting engaging user experiences. With a penchant for innovation, I continually push boundaries, seeking to make impactful contributions to the field of web development.

## PROJECTS

### 📦 Herb 'n Kitchen Restaurant E-Commerce Platform

- A modern, secure, and visually appealing online platform for a trendy restaurant, offering seamless browsing, ordering, and delivery.
- Used in HTML, CSS, JavaScript, PHP, and MySQL for that.

### 📦 Green Library System

- A Java-based Library Management System enabling users to interact with a catalog, borrow, return, and add books.
- Utilizes Java for system implementation, ensuring platform independence and robustness.

### 📦 Arogya Hospital Website

- Developed responsive, stylish website featuring hospital info, services, and contact details for seamless user experience.

### 📦 Sunset Apartment Management System (AMS)

- Streamlining apartment complex management with user-friendly interface and automated tasks.
- Programming languages used: HTML, JavaScript, CSS for front end; PHP for back end; MySQL for database management.

## RELEVANT SKILLS

- Java, Python, C++
- HTML, CSS, JavaScript, XML
- React
- MySQL, PHP
- Figma
- Version control systems (e.g. Git)
- Testing and debugging techniques
- Adaptability and continuous learning

## EDUCATIONAL HISTORY
